Huaxin Cement Co., Ltd. 2017 Annual Report Abstract

Stock Codes: 600801, 900933

I Important Notice

- 1. To fully understand the Company's operating results, financial condition and future development plan, investors should carefully read the full text of Annual Report from the website of Shanghai Stock Exchange or other websites designated by China Securities Regulatory Commission.
- 2. The Board of Directors of the Company and its members, the Board of Supervisors of the Company and its members and members of Top Management confirm, to the best of their knowledge, that there is no false or misleading statement or material omission in this report and shall be severally and jointly liable for the truthfulness, accuracy and completeness of its contents.
- 3. All the Directors attended the Board Meeting.
- 4. PricewaterhouseCoopers Zhong Tian CPAs LLP issued standard audit report with unmodified opinion for the Company.
- 5. Profit distribution proposal for the reporting period reviewed by the Board of Directors

In 2017, the Parent Company achieved net profit of 1,728,197,485 Yuan or 2,077,640,568 Yuan net profit attributable to the shareholders after consolidation. Pursuant to the relevant provisions contained in the Company Law and the Accounting Rule, 10%, i.e. 172,819,749 Yuan will be appropriated to statutory surplus common reserve fund. The allocable profit of the Parent Company is 4,415,356,360 Yuan by the end of December 2017.

The Board proposes that on the basis of the total 1,497,571,325 shares, a cash dividend of 0.28 Yuan per share (incl. tax) shall be distributed to all shareholders, hence 419,319,971 Yuan shall be distributed (covering 20% of the net profit attributable to the shareholders of the Parent Company after consolidation), and the whole of the remaining shall be booked as unallocated profit.

The Board also proposes that no capital reserve shall be converted into share capital for 2017.

2. The Company's main business during the reporting period

(I) Main business of the Company

At the beginning of the listing, the Company was engaging in manufacturing and sale of cement, cement technical services, research, manufacturing, installation and maintenance of cement equipment, as well as cement import and export trade. In recent years, through the vertical integration, overseas development strategy and the Eco business transformation strategy, the Company expanded its businesses to manufacturing and sales of RMX, aggregates, cement kiln co-processing of waste materials, EPC for both home and abroad cement projects, equipment business and project contracting regarding the cement kiln co-processing technology, new products with advanced technology content etc. The Company has been listed in the Chinese Manufacturing Industry Top 500 and Fortune China Top 500. So far, the Company owns 190 subsidiaries in Hubei, Hunan, Yunnan, Chongqing, Sichuan, Guizhou, Tibet, Guangdong and Henan as well as in Tajikistan and Cambodia, with total cement capacity of 90 million tons/year, cement equipment manufacturing capacity of 50 k tons/year, commercial concrete capacity of 23.8 million m3/year, aggregate capacity of 21 million tons/year, cement packing bag capacity of 400 million/year and wastes disposal capacity of 5.5 million tons/year (including CIPs).

In 2017, the cement business revenue accounted for 89% of the total operating revenue of the Company, playing a leading role in all the business areas.

(II) Operation model of the Company

1. Model of management

Guided by the management thought of corporate management and specialized operation, the Company established the organization structure of Corporate Headquarter-Business Unit-Subsidiary, forming an operation model featuring well defined power and responsibilities, high efficiency in operation and strong executive capability.

2. Model of production

Production of the Company is defined by sales volume. Subsidiaries formulate annual production and operation plan based on the demand in their respective regions.

3. Model of sale

The model of sale is that under the guidance of the Headquarter, integral management from Business Unit and equal importance are attached to both direct sale and distribution. The pursuit of quality is the core and the Company strives to promote the brand and maintain its value so as to improve competitiveness in the

market.

4. Model of procurement

The Company established a Category Procurement Management System in which procurement is managed by category and professionalism, thus realizing separation between procurement and utilization. Raw materials, fuels, auxiliary materials and spare parts for production in subsidiaries are all collectively procured by the Headquarter on a standard and process-oriented platform of procurement and bidding in a fair and transparent manner. Consequently, efficiency is improved and cost is lowered.

(III) Cement industry situation

Cement is an important basic building material which is widely used in national infrastructure construction including railway, highway, airport, water conservancy projects and other large infrastructure projects, as well as urban real estate development, rural infrastructure construction and civil construction.

Since 1985, China's annual cement output has been ranking the first in the world. However, with Chinese economy entering into a state of "New Normal", cement demand in China dropped after reaching the peak in 2014 and cement industry entered into a phase of overall overcapacity. Since 2016, governments started supply side structural reform and are on the way to deepen the policy. In 2017, the state government step up efforts in air pollution prevention and control in Beijing, Tianjin and Hebei as well as surrounding areas, conducted nationwide environmental supervision, quarry compliance regulation and expanded areas for peak shifting production. Therefore, environmental quality was improved to some extent. Some backward capacity has been phased out of the market. Chinese cement industry saw a periodic improvement in supply and demand and reasonable recovery in cement price, driving the prosperity to bounce back.

Early in the year, Ministry of Industry and Information and Technology issued Implementation Methods on Capacity Replacement in Steel, Cement and Glass Industry, aiming to improve supply and demand balance through strict control over new capacity and structural adjustment, which is beneficial to middle and long term development of cement industry. However, de-capacity in cement industry may still face severe situation. The way ahead is long while the task is daunting. Healthy development of the industry is still subject to grave overcapacity.
